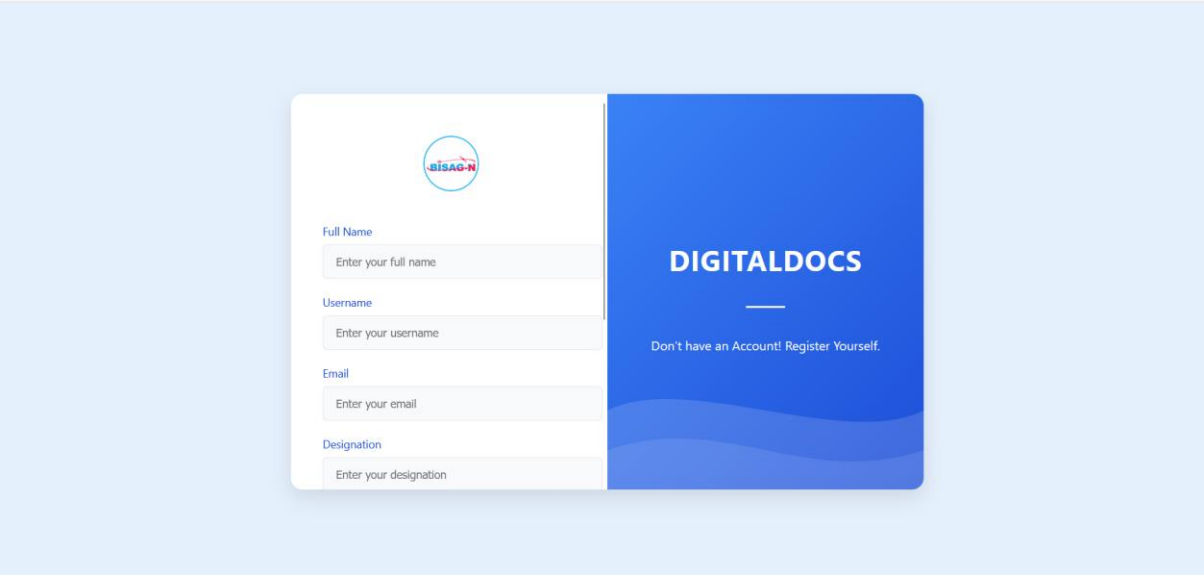
REGISTER:

Users begin by creating an account using their personal and organizational details. This account serves as their identity, allowing access to system features once verified. Registration initiates a secure onboarding process that aligns users with their department and role within the organization's document workflow.



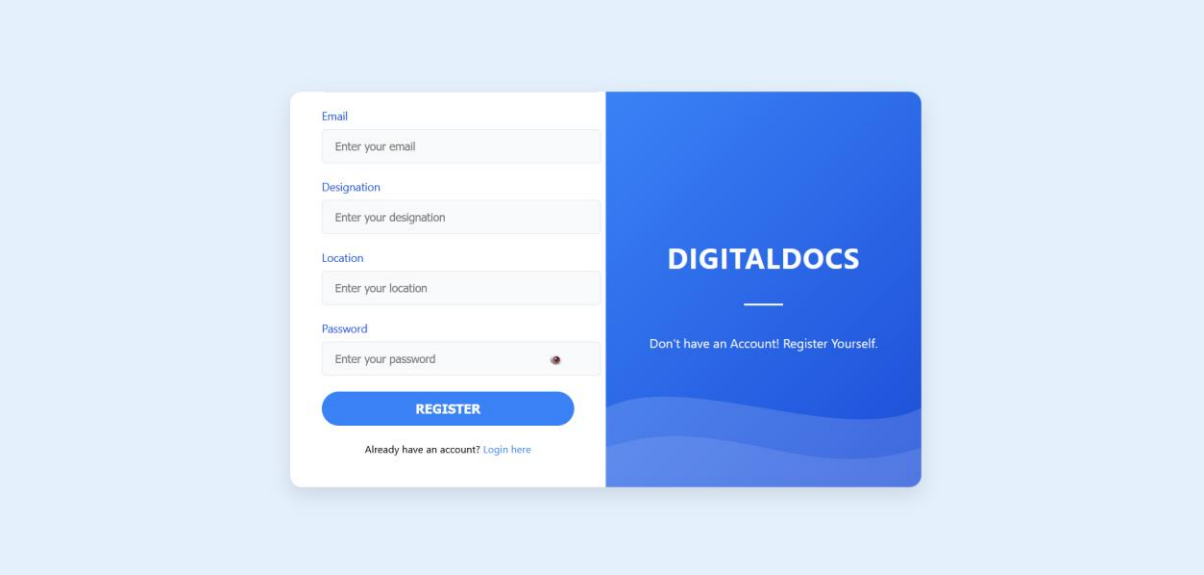


Figure 1 Registration Page

WAIT FOR APPROVAL:

After registration, users must enter a One-Time Password (OTP) sent via email. This step validates their identity. Once OTP verification is complete, the user's account enters a pending state for Superadmin approval. During this period, access to the system is restricted. The Superadmin evaluates the user's details and determines their appropriate department and role before granting access, maintaining strict administrative oversight.

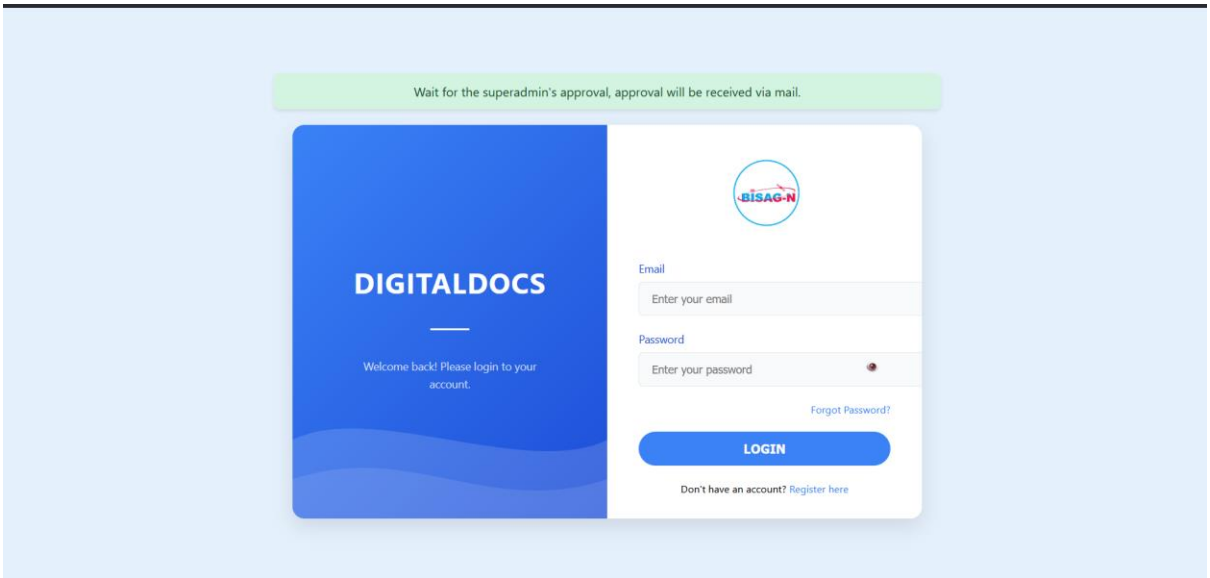

Figure 2 Wait for the superadmin's approval

LOGIN:

After approval, users can securely log in using their credentials. Successful login grants access to their personalized dashboard, where they can manage tasks, view documents. Login access is role-based, ensuring users only interact with features and data relevant to their permissions and responsibilities.

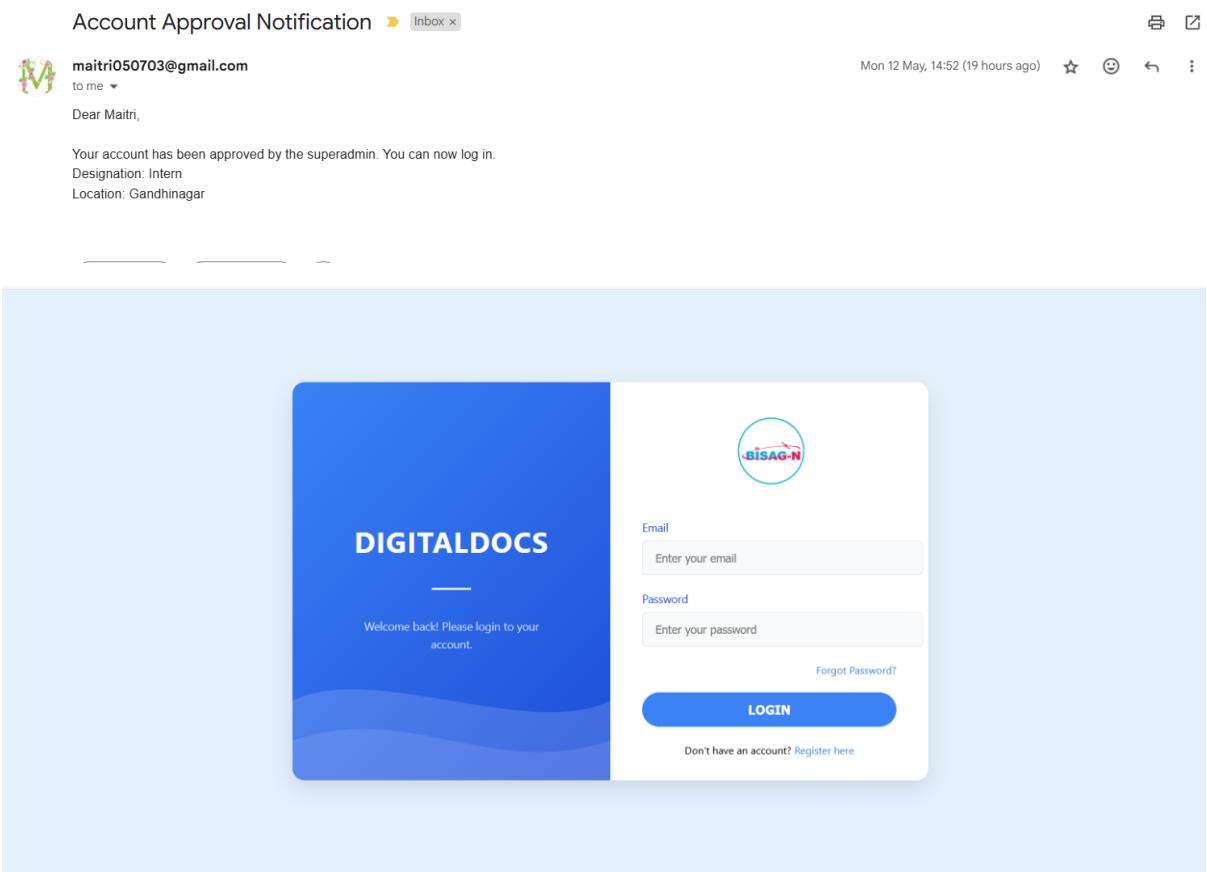

Figure 3 Login Page

DASHBOARD:

Users land on a personalized dashboard displaying key information like assigned documents, templates, and notifications. The dashboard acts as a command center for all activities, helping users stay organized and aware of their responsibilities and progress within the document management system.

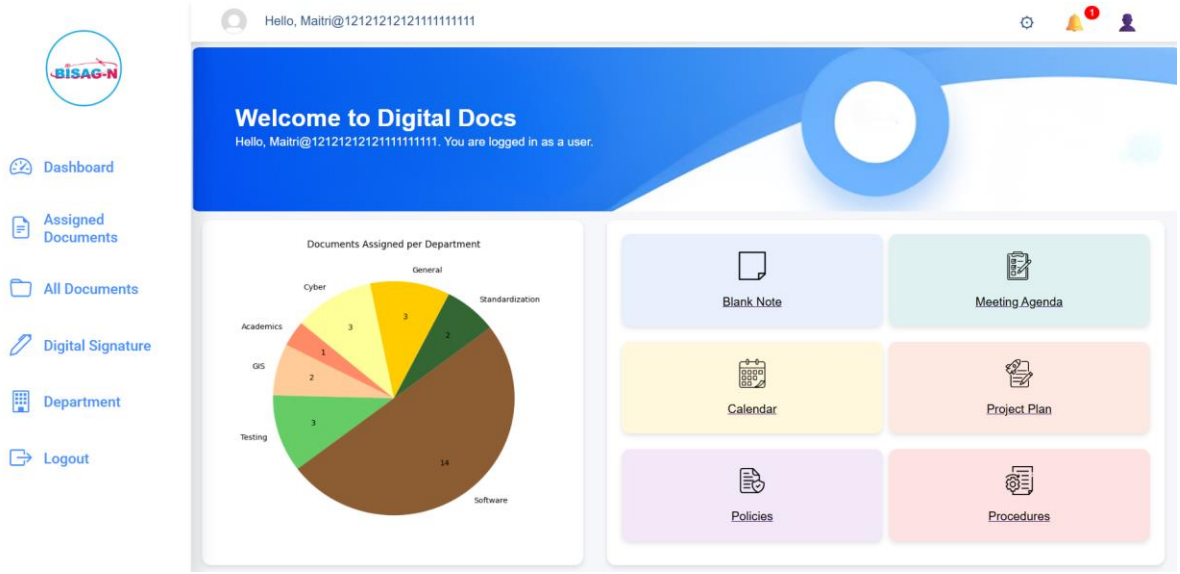

Figure 4 Dashboard Page

TEMPLATES:

The system provides ready-to-use templates for project plans, meeting agendas, policies, procedures,calendars, and notes. These templates improve document consistency and save time. Admins can choose, fill, and modify templates to suit departmental operations, maintaining standardization across different types of documentation and reporting.

NOTES:

To quickly capture and organize thoughts, action items, or updates during discussions, reviews, or individual work. It helps ensure important points are recorded for future reference.

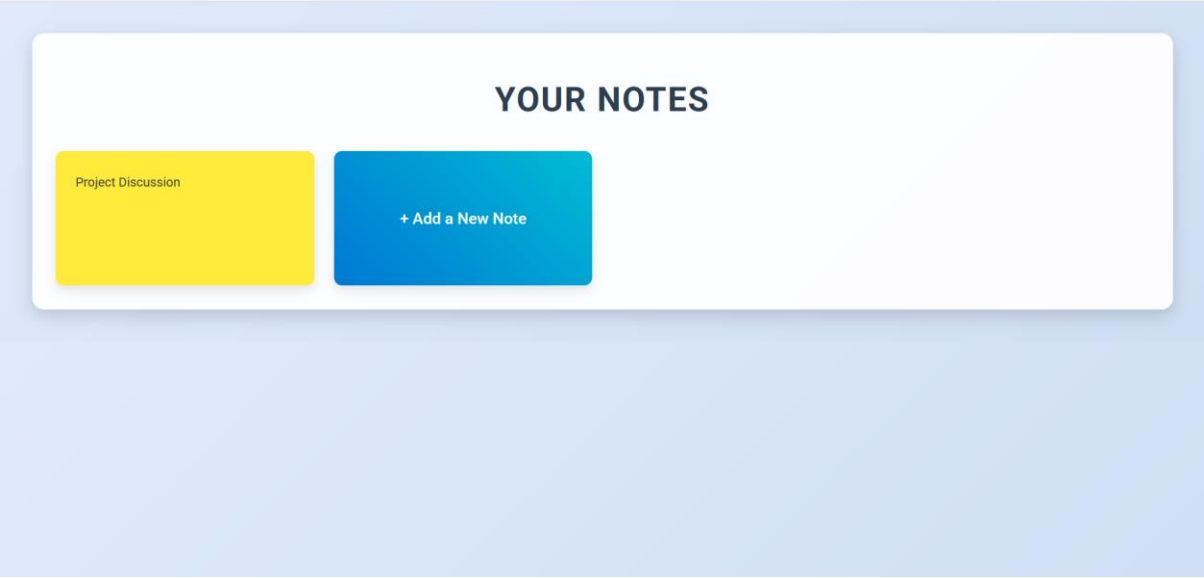

Figure 5 Notes Page

MEETING AGENDA:

To structure meetings by listing discussion title and details. It ensures focused, meetings with clear objectives and accountability.

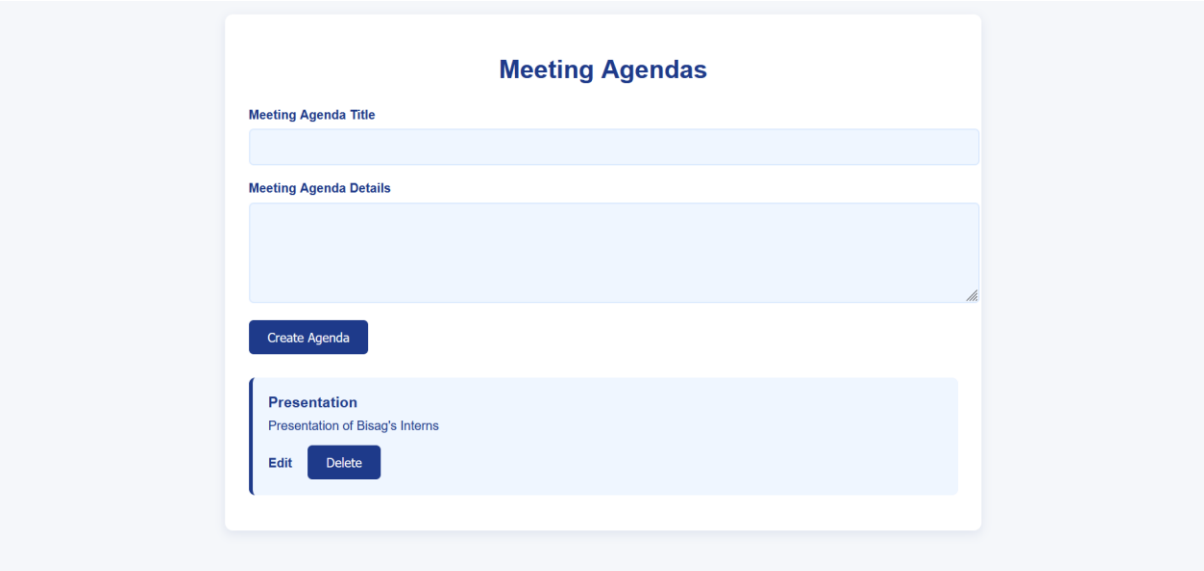

Figure 6 Meeting Agenda Page

CALENDAR:

To schedule and track key dates such as deadlines, events, meetings, or tasks. It supports time management and departmental coordination through a shared planning view.

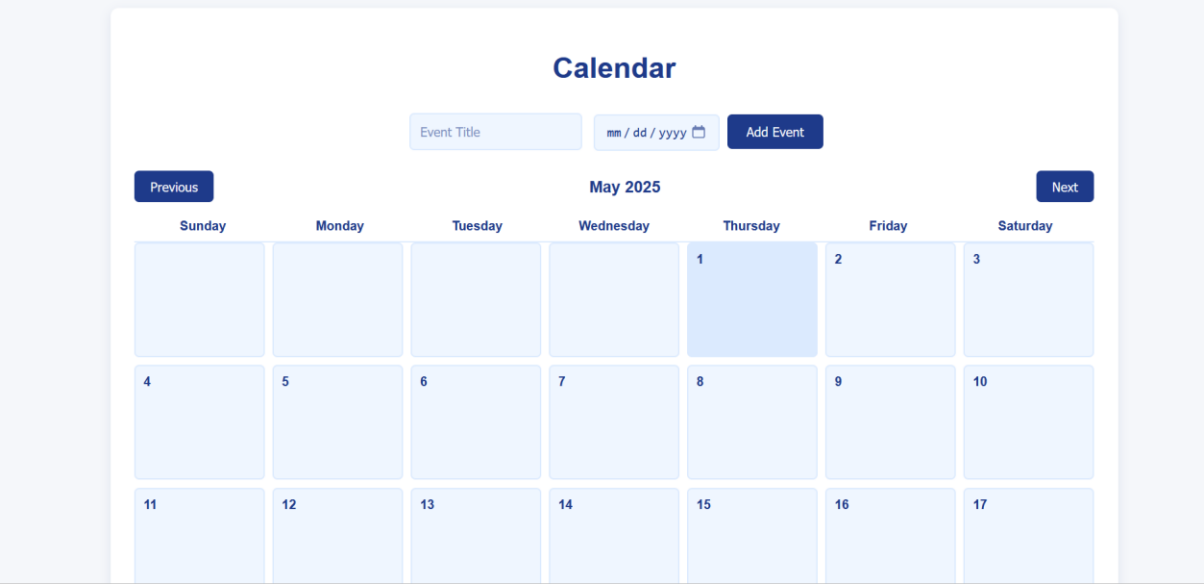

Figure 7 Calendar Page

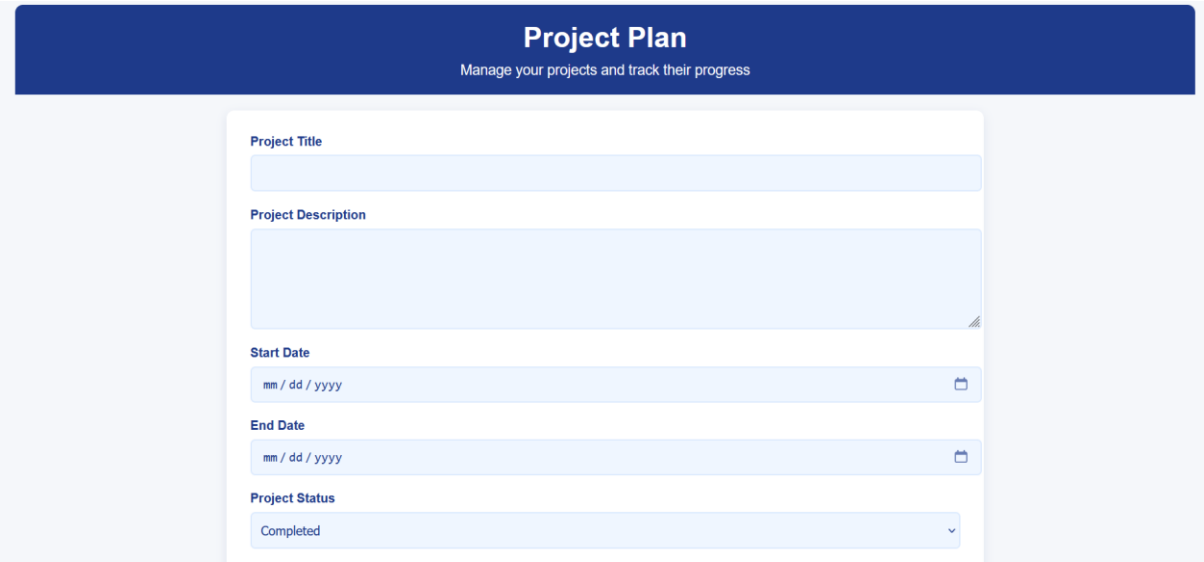
PROJECT PLAN:

To outline project goals, timelines, responsibilities, resources, milestones, and risks. It ensures all team members understand their roles and keeps the project on track.



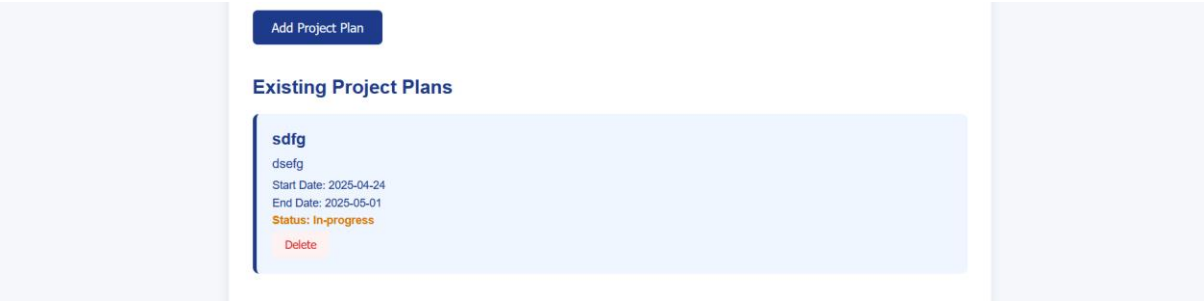


Figure 8 Project Page

POLICIES:

To document rules and guidelines .It helps maintain compliance, consistency, and clarity across departments.

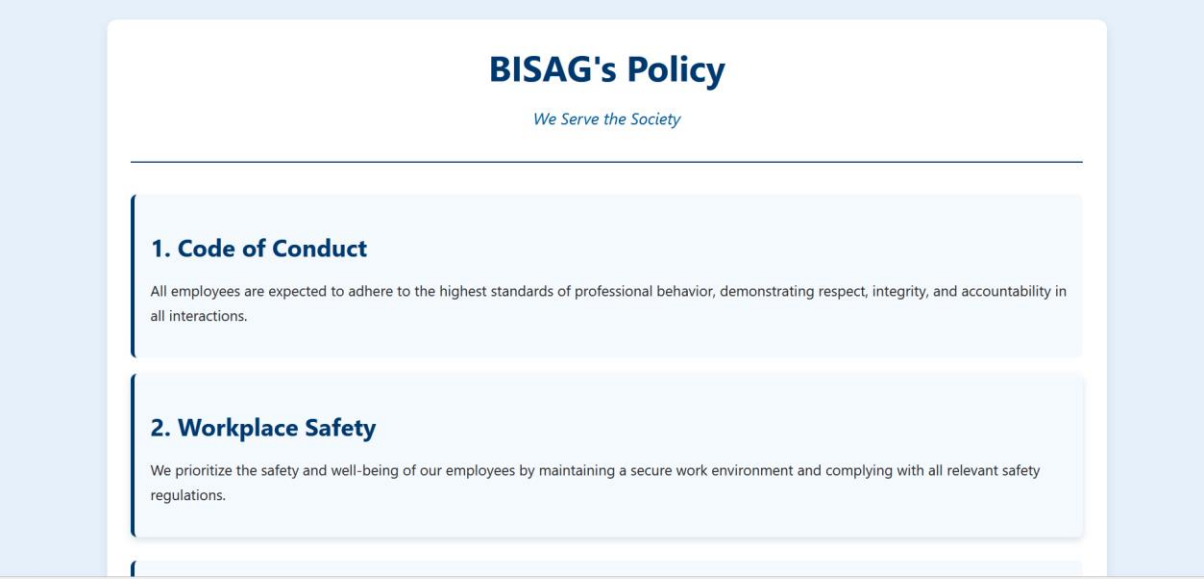

Figure 9 Policies Page

PROCEDURES:

To document standard operating procedures. It helps departments for recurring processes.

Figure 10 Procedures Page

PROFILE:

The profile feature displays a user's personal and professional details, including name, mail, role, profile picture, username.

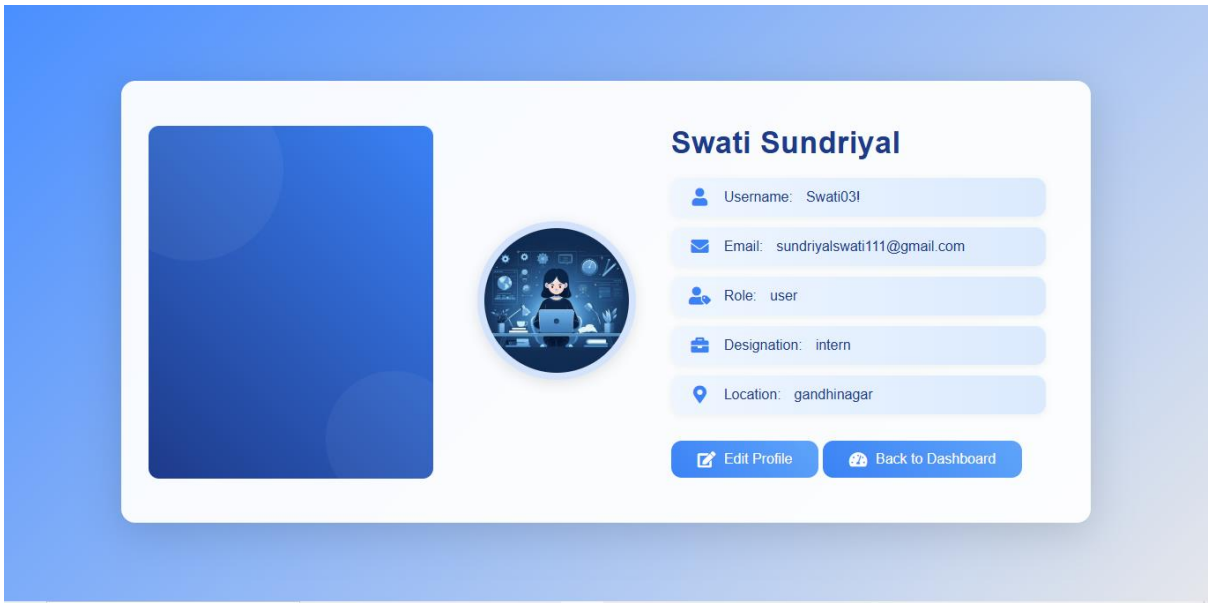

Figure 11 Profile Page

EDIT PROFILE:

The edit profile feature allows users to update their personal details, such as username, profile picture, mail.It ensures user records remain accurate and current.

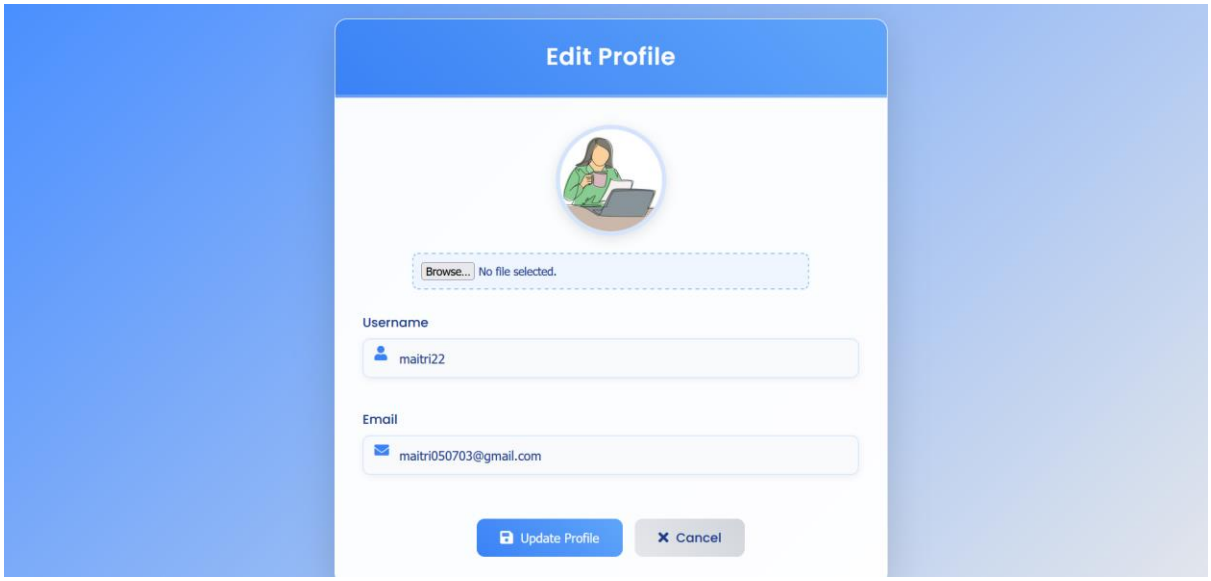

Figure 12 Edit Profile Page

UPDATE PASSWORD:

The update password feature enhances security by allowing users to change their current password through a clean and intuitive form. Users must enter their current password and confirm the new one. It prevents unauthorized access and reinforces data protection, maintaining strong authentication across the platform.

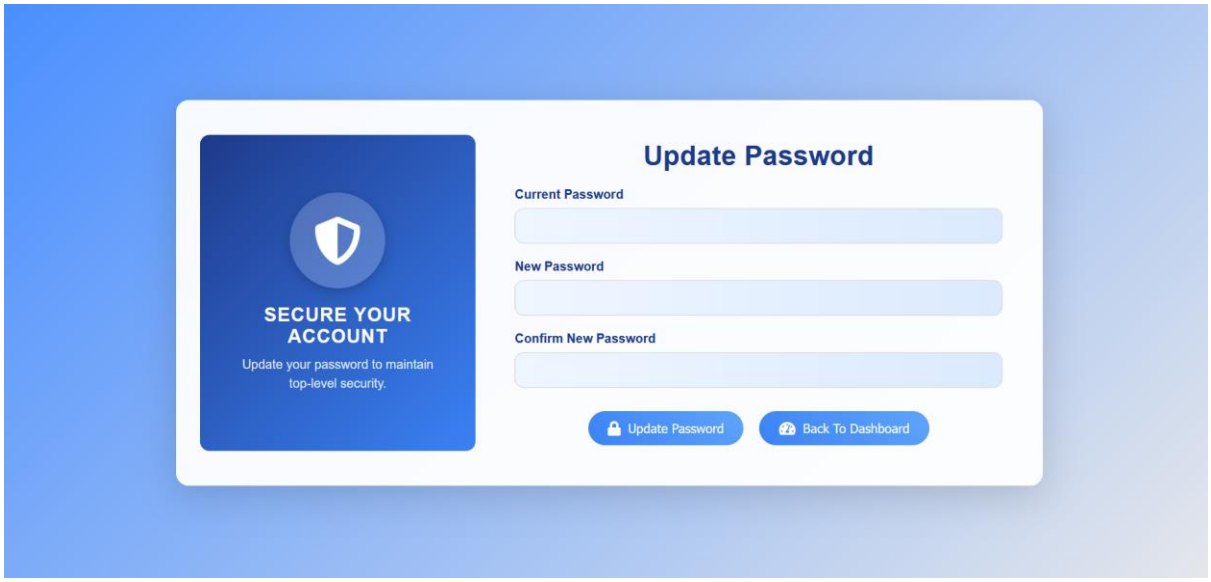

Figure 13 Update Password Page

ANNOUNCEMENTS:

The announcements feature allows users to view important messages from Superadmin. It keeps users informed about critical updates, deadlines, or actions, promoting efficient internal communication.

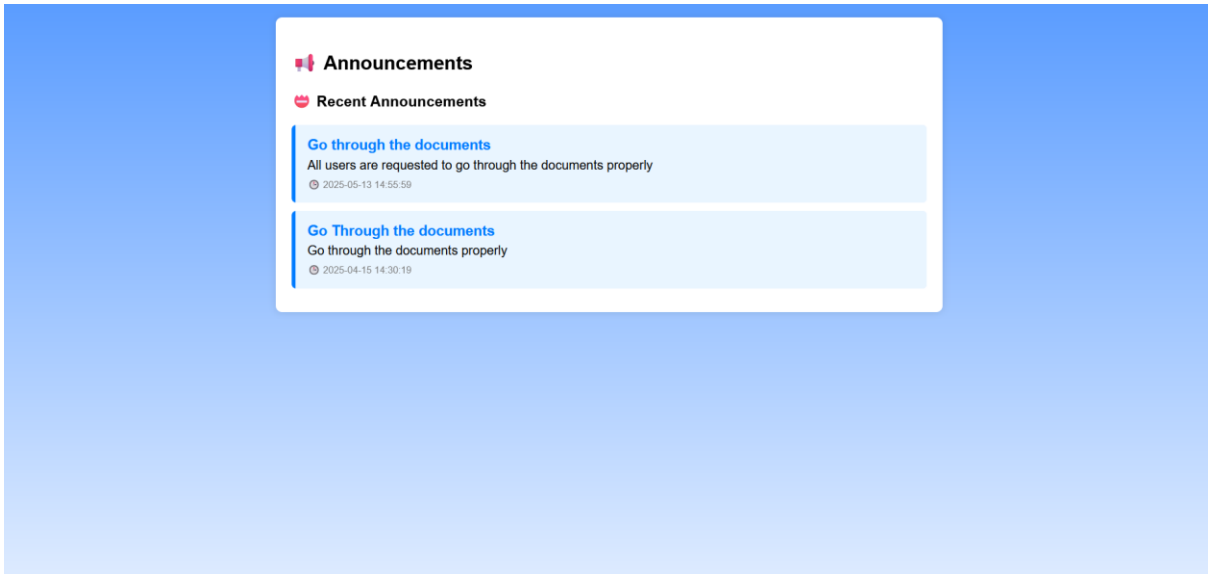

Figure 14 Notifications Page

ASSIGNED DOCUMENTS:

This feature displays documents assigned by the Superadmin to users. Each document card shows the title, department, and file type, with options to view or download. Users can search, sort by date, and navigate pages. It ensures easy access and organized tracking

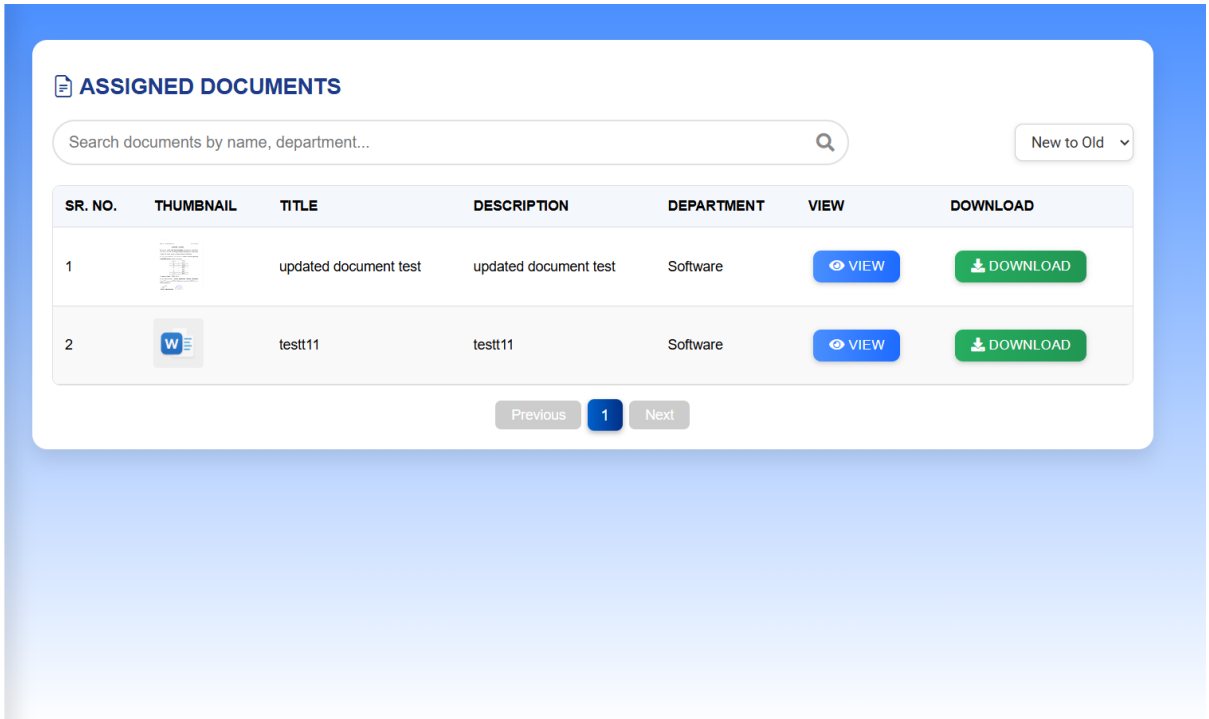

Figure 15 Assigned Documents Page

ALL DOCUMENTS:

All the documents uploaded by the Superadmin can be seen here for users and admins. They can also view or download the documents as per requirements

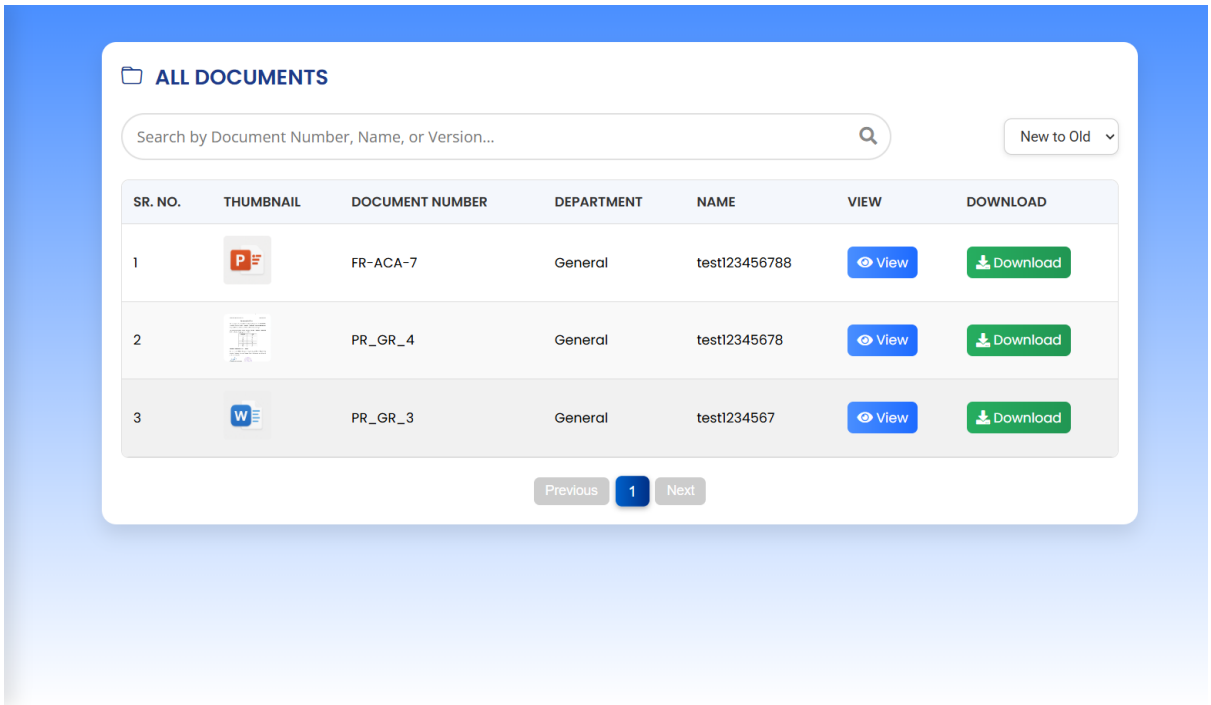

Figure 16 All Documents Page

DIGITAL SIGNATURE:

Digital Docs supports secure, digital signatures through OnlyOffice. Documents follow a structured signing workflow where the **Preparer**, **Reviewer**, and **Approver** each sign the document in sequence. All signatures are tamper-proof, and audit-ready, ensuring full accountability, transparency, and compliance throughout the approval process.

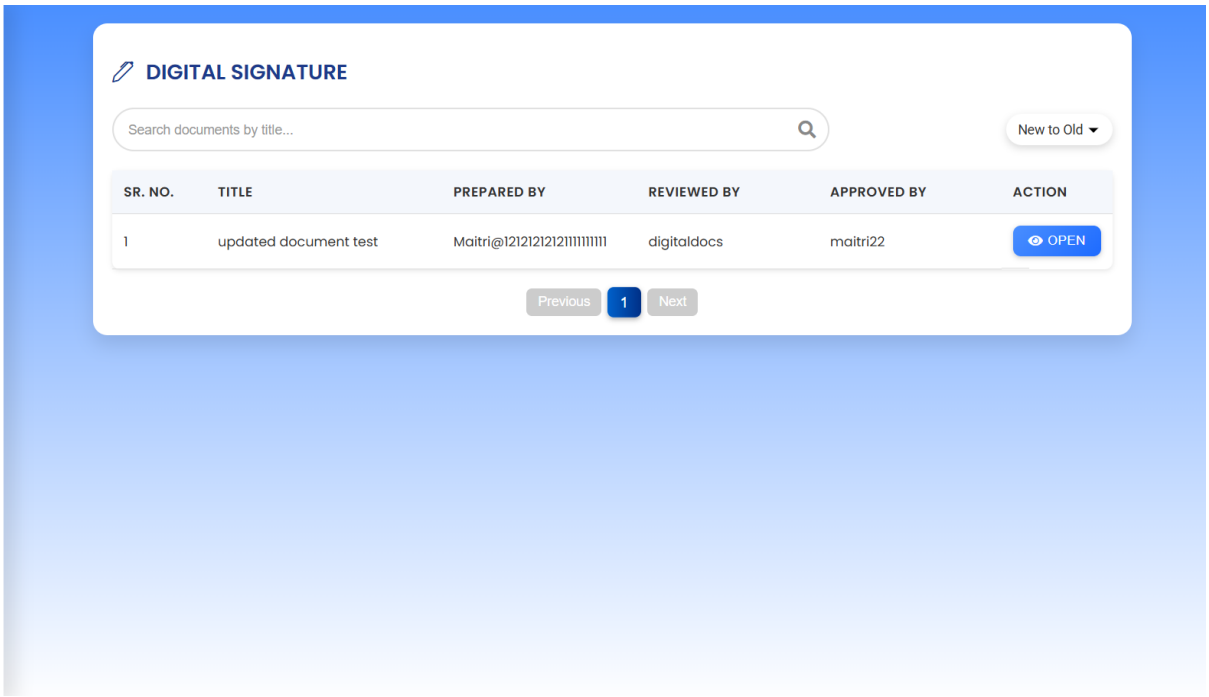

Figure 17 Digital Signature Page

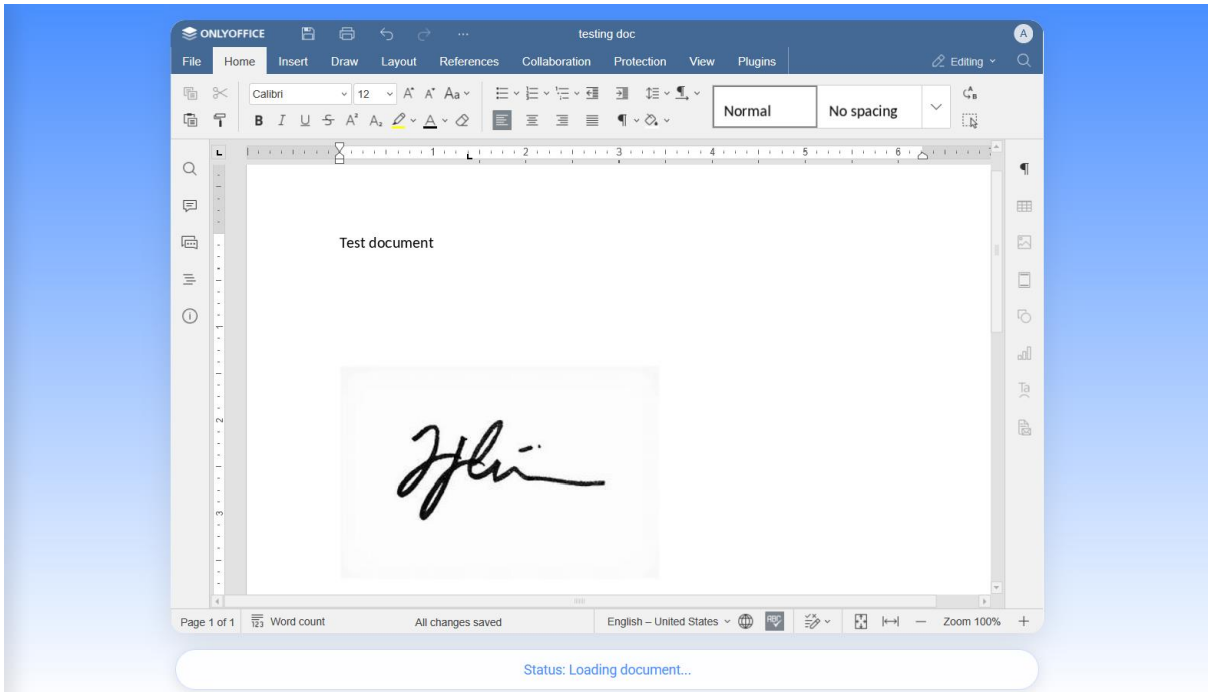

DEPARTMENTS:

Superadmin can create, rename, and manage departments according to organizational structure. Each department can have designated Admins and users. They can view and download the document as per department and sub-department if any.
